

Single-Family: Passive House Design + Certification

Are you looking for top quality services from seasoned Passive House consultants?

We are both International and North American Certified Passive House Consultants and have consulted on almost twenty Passive House projects throughout the U.S.. Whether you're seeking formal certification or just want the comfort and performance of a Passive House, we'll help educate your team about best building practices and provide clear guidance on what can seem to be a confusing myriad of options.

Explore our Passive House packages and learn how we can help you push the envelope:

Essentials

1. kickoff planning + working meeting
2. PHPP modeling: heating + cooling
3. energy optimization studies, analysis report + discussion
4. meetings: 1) structural + envelope; 2) HVAC, DHW + solar systems
5. in-depth plan review, comment matrix + discussion
6. PHPP modeling: total source energy

\$4750*

* fees may be higher for complex projects or extended design phases

Certification

1. all from Essentials Package
2. PHPP modeling: minor design-phase updates + as-built finalization
3. certification administration: team coordination, document gathering, Passive House Certifier submittal + review responses

\$6750**

** fees will also be due to the Passive House Certifier (e.g., Passive House Academy or PHIUS) and will range from \$1080-2650. contact us to discuss the most appropriate certification option for your project.

Add-Ons

half day intensive training for design team

\$750
